

STATE OF TENNESSEE  
**PROCLAMATION**  
BY THE GOVERNOR

**WHEREAS**, Necrotizing Fasciitis was first described within medical literature in 1883 by Fournier and was originally described as a disease of unknown cause; and

**WHEREAS**, it is an uncommon clinical disease of the layers of tissue under the skin that attracts a high profile within the popular media where it is often referred to as the "flesh eating bacteria or virus"; and

**WHEREAS**, Necrotizing Fasciitis can occur in any age group, although sometimes there are precipitating factors; it is most commonly associated with surgical procedures, but may be seen in those with diabetes mellitus, atherosclerotic vascular disease, malignancy and hypertension; and

**WHEREAS**, in rare occasions it may occur following minor injuries to the skin, falls, cuts or tears but sometimes is not apparent and can occur in apparently healthy individuals; and

**WHEREAS**, though it can affect anywhere on the body, the most common sites for it to involve are the abdomen, arms, legs, extremities, and face particularly around the eyes; and

**WHEREAS**, while progress has been made in understanding the symptoms and better diagnosing the disease, there is still much to learn about Necrotizing Fasciitis. With increased research, the goal of discovering the cause, improving treatment, and finding a cure are attainable;

**NOW, THEREFORE**, I, Governor Bill Lee, Governor of Tennessee do hereby proclaim the month of May 2022 as

*Necrotizing Fasciitis Awareness Month*

in Tennessee and encourage all citizens to join me in this worthy observance.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the official seal of the State of Tennessee to be affixed at Nashville on this fourth day of April, 2022.

A handwritten signature in blue ink that reads "Bill Lee".

Governor

A handwritten signature in blue ink, likely belonging to the Secretary of State.
