

STATE OF TENNESSEE

# PROCLAMATION

BY THE GOVERNOR

**WHEREAS**, in an effort to raise awareness in the United States about rare diseases, Rare Disease Day, on February 28, 2014, has been designated as the occasion to bring forth a national audience in an attempt to raise public knowledge about issues surrounding rare diseases; and

**WHEREAS**, there are nearly 7,000 diseases and conditions considered rare, each affecting fewer than 200,000 Americans; and

**WHEREAS**, while each of these diseases may affect small numbers of people, rare diseases as a group affect almost thirty million Americans; and

**WHEREAS**, many rare diseases are serious and debilitating conditions that have a significant impact on the lives of those affected; and

**WHEREAS**, while nearly 330 orphan drugs and biologics have been approved for the treatment of rare diseases affecting between eleven and fourteen million people according to the Food and Drug Administration, that leaves well over fifteen million Americans with rare diseases who have no treatment specific to their disease; and

**WHEREAS**, individuals and families affected by rare diseases often experience problems such as a sense of isolation, difficulty in obtaining an accurate and timely diagnosis, few treatment options, and problems related to accessing or being reimbursed for treatment; and

**WHEREAS**, some rare diseases, such as "Lou Gehrig's disease" and Huntington's disease, are relatively well known, but many others are not known at all by the public; and

**WHEREAS**, many patients and their families must bear a large share of the burden for raising funds for research; and

**WHEREAS**, the National Organization for Rare Disorders (NORD) organizes a nationwide observance of Rare Disease Day on February 28th, and patients, medical professionals, researchers, government officials, and companies developing treatments for rare diseases join together to focus attention on rare diseases as a public health issue on that day; and

**WHEREAS**, successes of the annual Rare Disease Day USA include governors in forty states issuing proclamations to recognize the important issue, rarediseaseday.us being launched, more than 350 groups signing on as Rare Disease Day Partners, and patient stories appearing on the television news, blogs, editorials, newspapers, and many other websites to address the traveling issue; and

**WHEREAS**, thousands of residents of our great State are among those affected by rare diseases;

**NOW, THEREFORE**, I, Bill Haslam, Governor of the State of Tennessee, do hereby proclaim February 28, 2014, as

## *Rare Disease Day*

in Tennessee and encourage all citizens to join me in this worthy observance.

**IN WITNESS WHEREOF**, I have hereunto set my hand and caused the official seal of the State of Tennessee to be affixed at Nashville on this third day of February, 2014.
